

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental corporation that includes Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States affiliate, Doosan Infracore America Corporation, operating in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer needs.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent dealers moving forklift supplies and materials handling equipment. This system helps Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line impressively features 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous truck designs range from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift business in the North American market, due to their stability in retaining a high level of client service quality and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. forklift division stationed in Cleveland has a expert team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial domestic lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a nationwide machinery expansion venture. Early sales of this industrialized equipment focused on large business communities, the armed services and on state-run firms. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for improving quality and product development.

Daewoo started the first domestic forklift business in 1967, and rapidly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological enhancements combined with sales success placed them in a situation of substantial expansion of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to counter act competitive pressures in the US materials handling industry. This plan greatly expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a contemporary plant which helped establish the business for the manufacture of high added-value products suitable for export. In 1993, the company had a international sales network and started exporting designs they had established through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international marketplaces.
