

Toyota Forklift Parts

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., often known as TMHU, continues to be the top selling lift truck supplier in the U.S. This company has been headquartered out of Irvine, California for well over 40 years, offering a complete line of quality lift trucks. With an impressive reputation of stability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are built here.

Every one of Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its commitment to relentless progress and its environmentally friendly systems. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift vehicles emit 70 percent less smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and regulations.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, associates Toyota's success to its robust commitment to fabricating the finest quality lift vehicles at the same time as delivering the utmost client service and assistance. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is among the magazines prestigious World's Most Admired Companies.

Redefining Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an exceptional company values towards environmental management within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability can not be matched by other corporations and undoubtedly no other resource handling maker can yet rival Toyota. Environmental responsibility is an important characteristic of corporate decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more involved 2010 emission standards. The end product is a lift truck that creates 70% less smog forming emissions than the present Federal standards allow.

Also starting in 2006, together with the Arbor Day Foundation, Toyota added to its dedication to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and neighborhood parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been spread through Toyota Industrial Equipment's network of sellers to non-profit organizations and neighborhood customers to help sustain communities all over the United States

Toyota's lift trucks offer superior durability, visibility, output, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also called "SAS"•, helps lessen the risk of mishaps and accidental injuries, and increasing productivity levels while minimizing the likelihood of merchandise and equipment breakage.

System Active Stability can discern factors that may lead to lateral instability and possible lateral overturn. When one of these conditions have been sensed, the SAS will immediately engage the Swing Lock Cylinder to re-stabilize the rear axle. This transitions the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding stability.

SAS was initially released to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS has been built-in to nearly all of Toyota's internal combustion models. It is standard equipment on the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker instruction, overturn fatalities across all brands have decreased by 13.6% since 1999. Also, there have been an overall 35.5% drop in industry wide collisions, loss of control, falls and tip overs from a lift vehicle for the same period.

Toyota's measure of brilliance reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training program to help clients meet OSHA standard 1910.178. Instruction programs, video lessons and a variety of resources, covering a wide scope of subjects-from individual safety, to OSHA regulations, to surface and load situations, are accessible through the vendor network.

Since the sale of its first lift truck in the U.S. to the manufacture of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has continued a solid presence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are manufactured in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of property.

Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service components, with the entire commitment exceeding \$113 million dollars.

The contemporary NCC was built to function for TMHU buyers and sellers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its originator, Sakichi Toyoda, in 1867, and lastly a training center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations all through the United States, offering the most complete and inclusive customer support and customer service in the industry. The company's new and Licensed Used lift trucks, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure total client satisfaction.
