

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started on a cross country RV trip. After spending numerous years establishing his family built crane company with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

Whilst on their journey, John spent time conversing with former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a vast marketplace for a product that could swiftly and securely lift individuals in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John established a joint venture with two friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they created and sold the first JLG aerial work platform. The company incorporates some of the simple design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has extended itself into several international markets and continues to cultivate contemporary equipment to ensure that clients are able to become safer and more well-organized within their workplace.
